FIRSTS FUND

FUND FACT SHEET · PROPOSED ACTIVELY MANAGED GLOBAL EQUITY UITF

A FinQuest 2026 proposal, not an existing BPI product · Portfolio as of 2 October 2026 · Page 1 of 2

"Fund your firsts."

FUND OBJECTIVE AND THEME

Objective. Long-term capital growth by investing directly in listed businesses around the world providing essential services and infrastructure: power and water, phone and internet networks, ports, airports, hospitals, and the equipment they run on.

How the fund invests, in one line. We identify businesses providing essential services and infrastructure, check their financial strength and value, and build a portfolio that balances opportunities with risk. How many companies we hold follows from that process. The fund is **actively managed with diversification and risk controls**; the manager may change holdings and weights within the mandate.

Why it exists. An early-career Filipino earns and saves in pesos, so their future depends on one economy. Firsts Fund would let them own a share of essential businesses around the world from ₱100, in pesos, through a fund that holds the shares directly with a single fee.

Suitable investor. Regular income, a goal at least **five years** away, and the risk tolerance for an equity fund that can fall sharply in a bad year. Not suitable for money needed within five years or for emergency savings.

Goal service (proposed, in the investor's own account). Close to a goal date there is little time to recover from a fall. A yearly goal review, plus a reminder two years before the date, lets the investor choose to move part of their units to a lower-risk fund. Nothing moves without their permission; it changes only their account, not how this fund invests; units are sold at that day's price, and the goal is not guaranteed.

For a regular saver (illustration, not a forecast). ₱1,000 a month for 5 years is ₱60,000 paid in. Across every 5-year stretch from 1990 to 2026 in the industry-level history (381 start months), the typical saver ended with about **₱80,000**. About 1 in 9 stretches ended below ₱60,000; the worst, ending in early 2009, at about ₱39,000. With the proposed goal service, the worst was about ₱52,000.

Same fee and costs; contributions at the start of each month. It reflects the theme, not our company choices.

KEY FACTS

Structure	Global equity UITF (proposed)
Currency	Philippine peso; daily NAVPU
Horizon	5 years or longer
Risk classification	Aggressive
Minimum (proposed)	₱100 to start and per top-up
Fee (proposed)	1.50% a year
All-in cost (est.)	about 2.1% a year, all costs
Buy or sell (proposed)	Any business day; paid T+5; no exit fee
Holdings	31 listed companies, 14 markets
Cash	About 3%, kept to pay redemptions
Limit per company	20% (BSP rule); largest today 5.8%
Benchmark	NFRA global infrastructure ETF, in pesos
Reviews	Holdings monthly; weights quarterly
Trustee	BPI Wealth (proposed)

ALLOCATION BY TYPE OF ESSENTIAL SERVICE

Digital networks	25.00%
Healthcare facilities	22.19%
Power generation & grids	19.22%
Ports	10.04%
Semiconductors	8.13%
Water	7.68%
Grid & power equipment	2.76%
Airports & toll roads	1.98%
Operating cash	3.00%

By listing market	
United States	22.96%
Hong Kong / China	10.98%
Saudi Arabia	10.91%
Germany	8.44%
Thailand	7.28%
Japan	5.56%
Malaysia	5.23%
Philippines	4.80%
6 other markets	20.84%

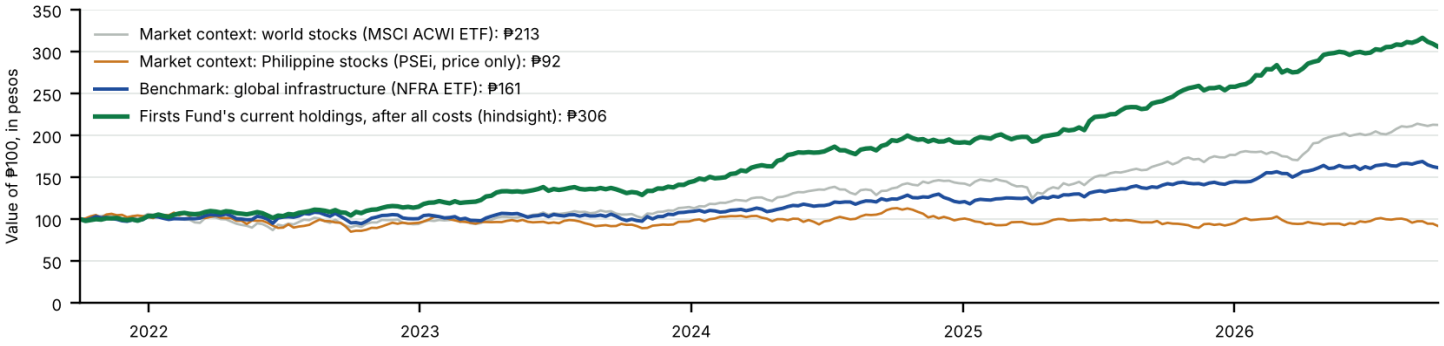

Largest holdings. Exelon 5.8%, Westports 5.2%, ICTSI 4.8%, Engie 4.6%, Bangkok Dusit Medical 4.5%. No company is above 5.8%; all 31 are listed on page 2.

No country quota. Philippine-listed ICTSI is held at 4.80% because it passed the same tests as every other company. Where a company is listed is not always where it earns its revenue.

Shared drivers. About 11% depends on data-centre spending (chips and grid equipment). Digital networks are at the fund's 25% limit per type of service.

PERFORMANCE VS BENCHMARK · PAST RETURNS OF TODAY'S HOLDINGS, IN PESOS · NOT ACTUAL FUND PERFORMANCE

₱100 invested in October 2021 → ₱306 for today's holdings after all costs, vs **₱161** for the benchmark: **25.0%** vs **10.0%** a year. **Hindsight:** these companies were chosen in October 2026, so this is not a forecast.

In pesos	2021*	2022	2023	2024	2025	2026*	A year	Volatility	Worst fall
Firsts Fund holdings, after costs	**+3.8%**	**+10.6%**	**+25.4%**	**+32.9%**	**+34.9%**	**+18.5%**	**+25.0%**	**10.2%**	**−7.4%**
Benchmark: NFRA infrastructure ETF	+3.1%	−2.4%	+8.3%	+10.2%	+19.8%	+12.2%	+10.0%	12.4%	−12.6%
Market context: world (MSCI ACWI ETF)	+6.3%	−11.4%	+21.5%	+24.7%	+23.7%	+20.2%	+16.2%	14.8%	−18.2%
Market context: Philippines (PSEi)	+2.7%	−6.8%	+1.7%	+2.8%	−6.3%	−2.0%	−1.7%	13.7%	−21.1%

Also, today's holdings over 5 years: last year +25.4%; last 3 years +32.6% a year · worst 12 months +4.3%, best +52.7% · return for each unit of ups and downs (Sharpe ratio) 2.00 vs 0.45 for the benchmark · moved about 0.59× as much as the benchmark (beta). **In pesos:** the deepest drop on a ₱5,000 balance was ₱372; a bad year like the 36-year worst (−27%) would be ₱1,363.

How to read this. These are past returns of the 31 companies we hold today, after the 1.50% fee, trading costs and dividend taxes; because they were picked knowing how they did, the fund's real results would likely be lower. **Without the 7 chip and grid-equipment companies**, the other 24 returned 18.7% a year (₱100 → ₱237), so the lead over the benchmark does not rest on them alone. **Over the long run:** an industry-level version of the strategy returned 12.0% a year from 1990 to 2026, about the same as the world market (12.2%), with a worst 12 months of −27%. Benchmark and references are ETFs after their own fees. *2021 from 1 Oct; 2026 to 2 Oct.

IMPORTANT. Firsts Fund is a student competition proposal; no such fund exists and nothing here is an offer, solicitation or investment advice. Simulated and historical figures do not represent actual trading. The value of units can fall as well as rise and an investor may get back less than invested. A UITF is not a deposit and is not insured by PDIC.

ALL 31 HOLDINGS · WEIGHTED SO EACH COMPANY ADDS A SIMILAR SHARE OF RISK · AS OF 2 OCTOBER 2026

Holding		Essential service	Weight	% of risk
Exelon	US	Power & grids	5.81%	3.9%
Westports	MY	Ports	5.23%	3.8%
ICTSI	PH	Ports	4.80%	3.6%
Engie	FR	Power & grids	4.57%	3.7%
Bangkok Dusit Medical	TH	Healthcare facilities	4.49%	3.6%
E.ON	DE	Power & grids	4.48%	3.7%
Dr. Sulaiman Al Habib	SA	Healthcare facilities	4.41%	3.7%
Guangdong Investment	HK	Water	4.36%	3.7%
KDDI	JP	Digital networks	3.81%	1.8%
Encompass Health	US	Healthcare facilities	3.78%	3.8%
AT&T	US	Digital networks	3.77%	2.3%
Mouwasat Medical Services	SA	Healthcare facilities	3.52%	3.7%
China Telecom	HK	Digital networks	3.33%	2.6%
Sabesp	BR	Water	3.31%	3.6%
China Mobile	HK	Digital networks	3.29%	2.0%
HCA Healthcare	US	Healthcare facilities	3.19%	3.6%

Holding		Essential service	Weight	% of risk
Enel	IT	Power & grids	2.98%	3.6%
Saudi Telecom	SA	Digital networks	2.97%	1.9%
Bharti Airtel	IN	Digital networks	2.97%	2.4%
Deutsche Telekom	DE	Digital networks	2.85%	2.4%
Bumrungrad Hospital	TH	Healthcare facilities	2.79%	3.5%
Qualcomm	US	Semiconductors	2.27%	3.5%
América Móvil	MX	Digital networks	2.01%	2.6%
OMA (airports)	MX	Airports & toll roads	1.98%	3.5%
Advantest	JP	Semiconductors	1.74%	3.4%
HD Hyundai Electric	KR	Grid & power equipment	1.65%	3.4%
NVIDIA	US	Semiconductors	1.64%	3.4%
Vistra	US	Power & grids	1.38%	3.4%
SK hynix	KR	Semiconductors	1.37%	3.4%
Micron	US	Semiconductors	1.12%	3.3%
Siemens Energy	DE	Grid & power equipment	1.11%	3.4%

Read the risk column, not the weight column. Weights run from 1.1% to 5.8%, but the 23 holdings outside the capped digital networks each carry a similar 3.3%–3.9% of risk: that is the design. NVIDIA gets 1.6% because it swings far more than a hospital operator. The 8 network companies carry less (1.8%–2.6%) because their kind is at the 25% cap. Chips are 8% of the money and 17% of the risk. Together they behave like about 9 independent groups. Weights are reset quarterly; companies we rejected or are watching are in the supporting proposal.

M · V · P: HOW WE BUILD THE PORTFOLIO · 140 COMPANIES SCREENED → 31 HELD · THE SAME PUBLISHED RULES FOR EVERY COMPANY

M — Map the capacity

Find the companies that own, run or supply essential services: up to the 20 largest listed in each of eight kinds, anywhere in the world, each worth at least US$1 billion (about ₱62 billion) on the stock market. Keep those that earn at least half their revenue from that service and generate cash.

140 → 129
140 screened · 129 fit the theme

→

V — Verify the merit

Check each company is a sound investment: survives a debt stress test sized to its industry, and compares well with its own peers on price and quality; tradeable; sound governance.

129 → 49
49 eligible · 35 rejected · 45 on watch

→

P — Position the risk

Add eligible companies in merit order, only if each one improves diversification. Size them so every holding adds a similar share of risk, within limits: 20% per company or group, 25% per kind of service, about 3% cash.

49 → 31
31 held · 18 on watch (added too little diversification)

Judgement sits in the published rules, not in picking favourites. Holdings are reviewed monthly and may be removed after a material event (with the reason logged), but are never resized by hand; weights are reset quarterly. Every company's result is in the supporting proposal.

KEY RISKS

Market	Share prices can fall sharply. In 36 years of industry-level history the worst 12 months lost 27% and the deepest fall was 44%.
Concentration	Digital networks are at the fund's 25% cap; data-centre spending drives about 11% of the fund but more of its past return (memory-chip makers are near a cyclical peak); Saudi Arabia 11% and US health policy about 7%.
Currency	About 92% is in foreign currencies and not hedged; a stronger peso lowers returns in pesos.
Liquidity	Each holding is kept small enough to sell within a week without moving its price much (sized for a ₱1bn fund), and about 3% is kept in cash. Many goals may fall due on the same dates (for example December); the manager sees goal dates in advance and can raise cash early.
Country and regulation	Companies in emerging markets, including some partly owned by governments, face policy and sanctions risk.
Selection	Companies are screened with one data provider and thresholds set by the team; the past results shown include hindsight.

FEES AND CHARGES

Management fee (proposed)	1.50% a year of fund value, accrued daily
Trading costs (modelled)	about 0.21% a year
Dividend withholding (modelled)	about 0.37% a year
Subscription / redemption fee	None proposed
Minimum holding period	None proposed; 5 years+ is a recommendation
Estimated all-in cost	**about 2.1% a year**

SUBSCRIPTIONS AND REDEMPTIONS (PROPOSED)

Buy units with a one-time amount, a regular monthly plan, or top-ups whenever you like. Sell on any business day at that day's price per unit (NAVPU); the money is paid on day 6, end of day, in line with BPI's peso global equity funds. A missed monthly contribution does not change your goal date and is not taken automatically later.

Compared with	What it is	Min.
Money market fund	Short-term debt	from ₱50
Pag-IBIG MP2	Government savings	₱500
Local stock index fund	PSEi shares	₱1,000
Global fund-of-funds	Owns other funds; two fee layers	₱1,000
Firsts Fund (proposed)	Global companies directly; one fee	₱100
