

FIRSTS FUND

FUND FACT SHEET · PROPOSED ACTIVELY MANAGED GLOBAL EQUITY UITF

A FinQuest 2026 proposal, not an existing BPI product · Portfolio as of 2 October 2026 · Page 1 of 2

"Fund your firsts."

FUND OBJECTIVE AND THEME

Objective. Long-term capital growth by investing directly in listed companies around the world that own, operate or supply essential, hard-to-replace capacity: power and water systems, digital networks, ports, airports, hospitals, and the equipment they run on.

How the fund invests, in one line. We identify businesses providing essential capacity, check their financial strength and value, and build a portfolio that balances opportunities with risk. The number of investments follows that process. The fund is **actively managed with diversification and risk controls**; the manager may change holdings and weights within the mandate.

Why it exists. An early-career Filipino earns and saves in pesos, tied to one economy. Today's options are a local index fund (0.52% a year over five years) or a global fund of funds with a second fee layer that trailed its index by 4.19 points a year. Firsts Fund would be a peso-priced global equity fund holding shares directly, with one fee layer.

Suitable investor. Regular income, a goal at least **five years** away, and the risk tolerance for an equity fund that can fall sharply in a bad year. Not suitable for money needed within five years or for emergency savings.

Separate goal service (proposed platform feature). An authorized account-level glidepath would gradually move part of an investor's Firsts Fund units into a lower-risk fund as their chosen goal approaches. It changes the investor's allocation, not this fund's mandate, uses redemption proceeds at a gain or a loss, and does not guarantee capital or goal completion.

Top 10 holdings	Listing	Capacity	Weight
Exelon	United States	Power generation & grids	5.81%
Westports	Malaysia	Ports	5.23%
ICTSI	Philippines	Ports	4.80%
Engie	France	Power generation & grids	4.57%
Bangkok Dusit Medical Services	Thailand	Healthcare facilities	4.49%
E.ON	Germany	Power generation & grids	4.48%
Dr. Sulaiman Al Habib Medical	Saudi Arabia	Healthcare facilities	4.41%
Guangdong Investment	Hong Kong / China	Water	4.36%

By listing market	
United States	22.96%
Hong Kong / China	10.98%
Saudi Arabia	10.91%
Germany	8.44%
Thailand	7.28%
Japan	5.56%
Malaysia	5.23%
Philippines	4.80%
6 other markets	20.84%

Countries are an outcome, not a target. There is no Philippine or global quota; Philippine-listed ICTSI is held at 4.80% because it passed the same tests as every other company. Listing market is not where revenue is earned.

Overlaps we watch. Data-centre build-out (chips and grid equipment) 10.89%; digital networks at the 25% internal limit.

Read this carefully. These are the past weekly returns of the 31 companies selected in October 2026 using October 2026 data, weighted with only the price history available at each quarter, after the 1.50% fee, 0.30% trading costs and estimated dividend withholding. Because the holdings were chosen with hindsight, this is **not** a backtest of the selection process and not a forecast. *2021 from 1 Oct; 2026 to 2 Oct. **Longer context:** an industry proxy (six US industries standing in for the eight types, 1990–2026, same weighting, fee and costs, no company screens) returned 12.0% a year against 12.2% for a same-cost market fund, with a worst fall of −44% and a worst 12 months of −27%. It is context for the theme, not evidence for the company screens.

IMPORTANT. Firsts Fund is a student competition proposal; no such fund exists and nothing here is an offer, solicitation or investment advice. Simulated and historical figures do not represent actual trading. The value of units can fall as well as rise and an investor may get back less than invested. A UITF is not a deposit and is not insured by PDIC.

Weights move as prices change and are reviewed quarterly and when material events affect a holding. Watchlisted and rejected companies, with reasons, and the full investment assessment for each holding are in the supporting proposal.

KEY RISKS	
Market	Equity prices can fall sharply. In the 36-year industry proxy the worst 12 months lost 27% and the deepest fall was 44%.
Concentration	Digital networks are at the 25% internal limit; data-centre build-out is about 11%; Saudi Arabia 11% and US health policy about 7%.
Currency	About 92% is in non-peso assets and unhedged; a stronger peso lowers peso returns.
Liquidity	Some holdings trade thinly; each position is limited to what could be sold in five days at 20% of average volume (sized for a ₱1bn fund). The manager holds operating cash and liquid instruments for redemptions.
Country and regulation	Holdings in emerging markets, including state-influenced companies, face policy and sanctions risk.
Model and data	Selection uses one data vendor and team-set thresholds; historical results include hindsight.

FEES AND CHARGES	
Management fee (proposed)	1.50% a year of NAV, charged daily
Trading costs (modelled)	about 0.21% a year
Dividend withholding (modelled)	about 0.37% a year
Subscription / redemption fee	None proposed
Minimum holding period	None proposed; 5 years+ is a recommendation

SUBSCRIPTIONS AND REDEMPTIONS (PROPOSED)

Units can be bought with a one-time amount, regular subscriptions or voluntary top-ups, and redeemed on any dealing day at the NAV per unit that day. Settlement follows the plan rules set by the trustee; no instant settlement is promised. Missed regular contributions do not change the goal date and are not caught up automatically.
